- ✓ Non-toxic and non-hazardous, suitable for the whole family
- ✓ Use on non-porous surfaces and in food manufacturing
- ✓ Certified to BS EN 1276, BS EN 13697 and BS EN 14476

*See page 3 for further details

99% NATURAL ALL-IN-ONE SANITISER...

... THAT PROVIDES A LONG-LASTING MOISTURISING HIGHLY ACTIVE PROTECTIVE SHIELD TO TREATED HANDS AND SURFACES

At the start of the coronavirus outbreak, an innovative UK-based adhesive, coating and application specialist company, Hybond tasks itself to develop a natural sanitiser that was kind to skin and the environment. Its team of qualified chemists took an existing additive that is used within the aerospace sector and developed it.

This resulted in a certified complex polymeric biocide ready to use aqueous solution that provides a fast-acting and ongoing antibacterial and antiviral protective film to treated hands and surfaces.

It kills on average 99.9999% of bacteria and viruses including coronaviruses. It is eco, vegan and pet friendly and safe to use around children and non-porous surfaces where food is prepared! Where possible, all packaging has been responsibly sourced and recyclable.

Always check data sheets as not all sanitisers are as safe as you think. XtraSAN does not contain alcohol or triclosan. It's non-hazardous, non-irritant, and non-flammable and has not been tested on animals.

XtraSAN ingredients are UK manufactured and 99% of them are natural. The solution has been certified to BSEN1276:2019 and BSEN13697:2015+A1:2019 against bacteria and effective against all enveloped viruses as defined in BSEN14476:2013+A2:2019 Annex A* including coronaviruses and SARS-CoV-2. It also conforms to the requirements of Biological Products Regulation. The consolidated version of EU Regulation 528/2012.

McKeever Consultancy, your distributor promises to bottle, store and dispatch XtraSAN using stringent quality controlled processes to ensure it remains contaminant free and tamper proof.

From cover: Kills Coronavirus, Influenza, Common Cold, Salmonella, SARS-CoV-2, MRSA, E-coli, Aspergillus Niger.

HOW TO USE AS A HAND SANITISER

Use to refill sanitising stations, hand foam bottles or dispensers.

As a hand sanitiser: Apply to hands and wrists, massage gently and allow to dry.

GOES 3X FURTHER THAN HAND GELS

HAND FOAM DISPENSERS

ACTS AS AN INVISIBLE GLOVE

Good regular hand hygiene is always best. This revolutionary 99% natural hand sanitiser can be used after hand washing as protection or, when hand washing facilities are not available. It is safe to apply to little hands and use around tiny paws.

The sanitiser not only moisturises the skin, it leaves a highly active long-lasting residual dry film that can sanitise anything you touch. Now that's impressive!

PORTABLE HAND FOAM DISPENSER SUITABLE FOR USE IN:

- ✓ Hospitals and healthcare
- ✓ Business entrances
- ✓ Nurseries and schools
- ✓ Hospitality and retail
- ✓ Food/drink manufacturing
- ✓ Public transport and airports
- ✓ Care homes and hospices

HOW TO USE SPRAY GUN ON SURFACES

Use to refill spray gun bottles. Always do a patch test in an inconspicuous area before application.

As a non-porous surface sanitiser: Spray on surface from a distance of 15-20cm. Leave to act for up to 5 minutes. Wipe away with a damp cloth, sponge or paper towel.

SAFE TO USE WITH FOOD

SPRAY GUN REFILLS

ACTS AS AN INVISIBLE SHIELD

The spray gun can be used on any non-porous surface as a generalised application. A non-porous material is one that cannot absorb liquid or gas.

Apply on high-touch smooth surfaces such as touch screens, door handles, taps, handrails, floors, toilet flushes, tables, toys etc, to help everyone stay healthy, well and confident that they are protected whilst on your premises.

SUITABLE FOR:

- ✓ Metals
- ✓ Varnished woods
- ✓ Sealed ceramics
- ✓ Glass
- ✓ Plastics
- ✓ Vinyls
- ✓ Coated paper/cardboard
